#### F METHOD AND ASSUMPTIONS USED TO ESTIMATE THE FAIR VALUE OF OPTIONS GRANTED DURING THE YEAR

The fair value has been calculated using the Black Scholes Option Pricing model

| The A | issumptions used in the model are as follows.  |              |
|-------|--|--------------|
|       | VARIABLES  | WEIGHTED AVG |
| 1.    | Risk Free Interest Rate  | 6.68%        |
| 2.    | Expected Life (in yrs)   | 4.06         |
| 3.    | Expected Volatility  | 33.52%       |
| 4.    | Dividend Yield   | 1.27%        |
| 5.    | Weighted Average Price of the underlying share in market at the time of the option grant $(\overline{\mathfrak{r}})$ | 57.90        |

#### ASSUMPTIONS

**Risk-free rate of return:** The risk-free interest rate being considered for the calculation is the interest rate applicable for a maturity equal to the expected life of the Options based on the zero-coupon yield curve for Government Securities.

Time to Maturity: Bank has estimated the expected life of the Options on the basis of average of minimum and maximum life of the Options. Historical data for early exercise of Options is not available, hence not considered in expected life calculations. Volatility: Volatility is the measure of the amount by which a price has fluctuated or is expected to fluctuate during a period. The measure of volatility used in the Black-Scholes options pricing model is the annualized standard deviation of the continuously compounded rates of return on the stock over a period of time. For calculating volatility, the daily volatility of the stock prices on the National Stock Exchange of India Limited, over a period prior to the date of grant, corresponding with the expected life of the Options has been considered. **Expected divided yield:** The latest dividend declared is considered as the dividend expected to be paid during the vesting period.

**Stock Price:** Being the closing price on the stock exchange with the highest trading volumes on the last working day prior to the date of grant.

No other feature has been considered for fair valuation of Options except as mentioned in point F above.
