Sub: Recommendation of fair exchange ratio for the proposed merger of Capital First Limited into IDFC Bank Limited

Dear Sir / Madam,

We refer to the engagement letter whereby, IDFC Bank Limited (hereinafter referred to as "IBL") has appointed S. R. Batliboi & Co. LLP (hereinafter referred to as "SRBC" or "Valuer" or "We") for recommendation of fair exchange ratio of equity shares for the proposed merger of Capital First Limited ("CFL") into IBL ("Proposed Merger"), based on the discussions that we have had with and information that we have received from the representatives and Management of IBL ("Management") from time to time in the above matter.

IBL and CFL are hereinafter jointly referred to as the "Companies".

SCOPE AND PURPOSE OF THIS REPORT

IBL is primarily engaged in providing banking services in India. The equity shares of IBL are listed on the Bombay Stock Exchange ("BSE") and the National Stock Exchange in India ("NSE"). IBL was incorporated in 2014. IBL had reported consolidated total income and profit after tax of INR 9,597.4 crores and INR 1,018.7 crores respectively, for the year ended 31 March 2017.

CFL is a Non –Deposit Accepting Non-Banking Financial Company ("NBFC") which provides loans for property, business, personal loans, two-wheeler loans, consumer durable loans, and pre-owned car loans. The equity shares of CFL are listed on BSE and NSE. CFL was incorporated in 2005. CFL had reported consolidated total income and net profit after tax of INR 2,800.9 crores and INR 238.9 crores respectively for the year ended 31 March 2017.

Capital First Home Finance Limited ("CFHFL") a 100% subsidiary of CFL, is engaged in the business of housing finance. CFHFL was incorporated in 2010 and is headquartered in Mumbai. CFHFL had reported total income and net profit after tax of INR 71.2 crores and INR 6.4 crores respectively for the year ended 31 March 2017.

Capital First Securities Limited ("CFSL"), another 100% subsidiary of CFL provides business advisory, business support services and loan syndication. CFSL was incorporated in 2007 and is based in Mumbai. CFSL had reported total income and net profit after tax of INR 14.9 crores and INR 14.3 crores respectively for the year ended 31 March 2017.

We understand that the Management is contemplating the merger of CFL, CFHFL and CFSL into IBL ("Proposed Merger") under a composite scheme of Arrangement and Amalgamation under the provisions of Sections 230-232 of the Companies Act, 2013 and The Companies Rules 2016. Since, CFHFL and CFSL are wholly owned operating subsidiaries of CFL, no separate shares will issued to the shareholders of CFL. Accordingly, as a consideration for this Transaction, equity shareholders of CFL would be issued equity shares of IBL.

For the aforesaid purpose, the Board of Directors of IBL has appointed SRBC to recommend a fair exchange ratio, for the issue of IBL's equity shares to the equity shareholders of CFL, to be placed before the Audit Committee/Board of Directors of IBL.

Our appointment was formalized via engagement letter dated 12 January 2018, however, the work had started earlier.

The Board of Directors of CFL has appointed another independent valuer, Walker Chandiook & Co. LLP, Chartered Accountants ("WCC"), to recommend a fair exchange ratio, for the issue of IBL's equity shares to the equity shareholders of CFL, to be placed before the Audit Committee/Board of Directors of CFL. We and WCC have received information and clarification from or on behalf of their respective clients. We and WCC have independently arrived at different values per share of the Companies. However, to arrive at the consensus on the fair exchange ratio for the Proposed Merger, appropriate rounding off adjustments have been done.

We understand that the appointed date for the merger is 01 April 2018 or such other date as approved by the Courts.

The scope of our services is to conduct a relative (and not absolute) valuation of equity shares of the Companies and report a fair exchange ratio for the Proposed Merger in accordance with generally accepted professional standards.

We have been provided with audited financial statements and other financial information of IBL and CFL for the year ended 31 March 2017 and latest available half yearly result of respective companies. We have taken into consideration the current market parameters in our analysis and have made adjustments for additional facts made known to us till the date of our Report. Further, the Management has informed us that all material information impacting the Companies have been disclosed to us.

The Management has informed us that:

- (a) There would not be any capital variation in the Companies till the Proposed Merger becomes effective without approval of the shareholders other than on account of existing ESOP Scheme which would not be material;
- (b) Neither Companies would declare any dividend which are either materially different than those declared in the past few years or having materially different yields.
- (c) There are no unusual/abnormal events in both the Companies since the last quarterly results were declared till the Report Date materially impacting their operating/financial performance.

We have relied on the above while arriving at the fair exchange ratio for the Proposed Merger.

This Report is our deliverable for the above engagement.

This Report is subject to the scope, assumptions, exclusions, limitations and disclaimers detailed hereinafter. As such, the Report is to be read in totality, and not in parts, in conjunction with the relevant documents referred to therein.

The determination of exchange ratio is not a precise science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgement. In the ultimate analysis, valuation will have to be tempered by the exercise of judicious discretion by the Valuer and judgment taking into accounts all the relevant factors. There is, therefore, no indisputable single exchange ratio. While we have provided our recommendation of the exchange ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the exchange ratio of the equity shares of IBL and CFL. The final responsibility for the determination of the exchange ratio at which the Proposed Merger shall take place will be with the Board of Directors of IBL who should take into account other factors such as their own assessment of the Proposed Merger and input of other advisors.

In the course of the valuation, we were provided with both written and verbal information, including market, financial and operating data as detailed in the section - Sources of Information.

We have not independently investigated or otherwise verified the financial information provided by IBL. Accordingly, we do not express an opinion or offer any form of assurance regarding the truth and fairness of the financial position as indicated in the financial statements. Also, with respect to explanations and information sought from IBL, we have been given to understand by the Management of IBL that they have not omitted any relevant and material factors about the Companies and that they have checked the relevance or materiality of any specific information to the present exercise with us in case of any doubt. Our conclusion is based on the assumptions and information given by/on behalf of IBL. The Management of IBL has indicated to us that they have understood that any omissions, inaccuracies or misstatements may materially affect our valuation analysis/results.

The Report assumes that IBL and CFL comply fully with relevant laws and regulations applicable in all its areas of operations, and that IBL and CFL will be managed in a competent and responsible manner. Further, this Valuation Report has given no consideration to matters of a legal nature, including issues of legal title and compliance with local laws, and litigation and other contingent liabilities that are not disclosed in the audited/unaudited balance sheet of the Companies. Our conclusion of value assumes that the assets and liabilities of the Companies, reflected in their respective latest balance sheets remain intact as of the Valuation Report date.

The report does not address the relative merits of the Proposed Merger as compared with any other alternative business transaction, or other alternatives, or whether or not such alternatives could be achieved or are available.

The fee for the engagement is not contingent upon the results reported.

We will not be liable for any losses, claims, damages or liabilities arising out of the actions taken, omissions of or advice given by any other to IBL. In no event shall we be liable for any loss, damages, cost or expenses arising in any way from fraudulent acts, misrepresentations or willful default on part of the Companies, their directors, employees or agents.

It is understood that this analysis does not represent a fairness opinion. This report is not a substitute for the third party's own due diligence/ appraisal/ enquiries/ independent advice that the third party should undertake for his purpose.

This valuation report is subject to the laws of India.

Neither the valuation report nor its contents may be referred to or quoted in any registration statement, prospectus, offering memorandum, annual report, loan agreement or other agreement or document given to third parties, other than in connection with the proposed Scheme of Arrangement and Amalgamation, without our prior written consent. APPROACH - BASIS OF MERGER

The Proposed Scheme of Amalgamation contemplates the merger of CFL into IBL. Arriving at the fair exchange ratio for the Proposed Merger of CFL into IBL would require determining the relative value of the equity shares of CFL and the equity shares of IBL. These values are to be determined independently, but on a relative basis for both the Companies.

There are several commonly used and accepted methods for determining the fair exchange ratio for the Proposed Merger of CFL into IBL, which have been considered in the present case, to the extent relevant and applicable, and subject to availability of information, including:

1. Market Price method
2. Comparable Companies Quoted Multiples method
3. Discounted Cash Flows method
4. Net Asset Value method

It should be understood that the valuation of any company or its assets is inherently subjective and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the Companies. In addition, this valuation will fluctuate with

changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the Companies, and other factors which generally influence the valuation of the Companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Market Price Method

The market price of an equity share as quoted on a stock exchange, where the shares regularly and freely traded in, is normally considered as the value of the equity shares of that company. Further, in the case of a merger, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard.

In the present case, the equity shares of the Companies are listed on BSE and NSE. The share price observed on NSE for the respective Companies over a reasonable period have been considered for arriving at the value per share of the Companies under the market price method.

Comparable Companies' Quoted Multiple (CCM) method

Under this method, value of equity shares of a company is arrived at by using multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

We have considered Price to Book (P/BV) multiple and Price to Earnings (P/E) multiple of the comparable listed companies for the purpose of our valuation.

The total value of equity shareholders is then divided by the number of diluted equity shares (considering impact of ESOPs outstanding) for arriving at the value per equity share of the Companies under CCM method.

Discounted Cash Flows ("DCF") Method

Under the DCF method the projected free cash flows to the equity shareholders are discounted at the cost of equity. The sum of the discounted value of such free cash flows is the value of the firm.

Using the DCF analysis involves determining the following:

Estimating future free cash flows:

Free cash flows are the cash flows expected to be generated by the company that are available to the providers of the company's equity capital.

Appropriate discount rate to be applied to cash flows i.e. the cost of equity:

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to the equity capital providers (namely equity shareholders). The opportunity cost to the equity capital provider equals the rate of return the equity capital provider expects to earn on other investments of equivalent risk.

We have not used DCF method as the Management has not provided us with the financial projections.

Net Asset Value ("NAV") Method

The asset based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. This valuation approach may be used in cases where the assets base dominates the earnings capability. A Scheme of Amalgamation would normally be proceeded with, on the assumption that the companies amalgamate as going concerns and an actual realization of the operating assets is not contemplated.

We have not used NAV method as it does not capture the earning capacity of the business and hence NAV would not be representative of fair value.

MAJOR FACTORS THAT WERE TAKEN INTO ACCOUNT DURING THE VALUATION

- The equity shares of IBL and CFL are frequently traded on both the stock exchanges, BSE & NSE in India.
- Key operating / financial parameters of Companies vis-à-vis its comparable companies.

BASIS OF FAIR EXCHANGE RATIO

The basis of the Transaction of CFL into IBL would have to be determined after taking into consideration all the factors and methods mentioned hereinabove. Though different values have been arrived at under each of the above methods, for the purposes of recommending the fair exchange ratio of equity shares it is necessary to arrive at a final value for each of the Companies' shares. It is however important to note that in doing so, we are not attempting to arrive at the absolute equity values of IBL and CFL but at their relative values to facilitate the determination of the fair exchange ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approaches / methods.

The fair exchange ratio has been arrived at on the basis of a relative equity valuation of IBL and CFL based on the various approaches / methods explained herein earlier and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of IBL and CFL, having regard to information base, key underlying assumptions and limitations.

We have independently applied methods discussed above, as considered appropriate, and arrived at their assessment of value per share of IBL and CFL.

The computation of fair exchange ratio is tabulated below:

Valuation Approach	IBL		CFL	
	Value per Share (INR)	Weight	Value per Share (INR)	Weight
Asset Approach - Net Asset Value Method	44.4	0%	251.5	0%
Market Approach – Market Price method	55.8	50%	785.2	50%
Income Approach – Comparable Companies Multiples Method	62.8	50%	860.5	50%
Relative Value per Share	59.3		822.8	
Fair Exchange Ratio (rounded off)			13.9	

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined hereinabove, we recommend the following fair exchange ratio for the Proposed Merger of CFL into IBL:

139 (One Hundred and Thirty Nine) equity shares of IBL of INR 10/- each fully paid up for every 10 (Ten) equity shares of CFL of INR 10/- each fully paid up.

APPROACH - BASIS OF PROPOSED AMALGAMATION

We understand from the Management that the proposed Scheme of Arrangement contemplates the merger of the CFL and the Subsidiaries into IDFC Bank pursuant to sections 230 to 232 of the Companies Act, 2013. Arriving at the Share Exchange Ratio for the Proposed Amalgamation of CFL and its Subsidiaries into IDFC Bank would require determining the value of CFL relative to value of equity shares of IDFC Bank. These values are to be determined independently without considering the current Proposed Amalgamation.

Recommendation of share exchange ratio for the Proposed Amalgamation of CFL and its Subsidiaries into IDFC Bank

There are several commonly used and accepted methods for determining the value of CFL and IDFC Bank, which have been considered in the present case, to the extent relevant and applicable, including:

1. Market Price method
2. Comparable Companies Multiples method
3. Discounted Cash Flows method
4. Net Asset Value method

It should be understood that the valuation of any business / company or its assets is inherently subjective and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the companies, and other factors which generally influence the valuation of business / companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner, based on our previous experience of assignments of a similar nature.

Market Price (MP) Method

The market price of an equity share as quoted on a stock exchange is normally considered as the value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inherent in the value of the shares. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share especially where the market values are fluctuating in a volatile capital market or when market prices do not seem to be reflective of financial performance. Further, in the case of a merger / amalgamation, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard.

In the present case, the shares of both CFL and IDFC Bank are listed on BSE and NSE and there are regular transactions in their equity shares with reasonable volumes. In these circumstances, the volume weighted average share price observed on NSE for CFL and IDFC Bank over a reasonable period has been considered for determining their respective values under the market price methodology.

(This space has been intentionally left blank)

Recommendation of share exchange ratio for the Proposed Amalgamation of CFL and its Subsidiaries into IDFC Bank

Comparable Companies' Market/Transaction Multiple (CCM) method

Under this method, value of the company is arrived at by using multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies and transaction valuations of listed or unlisted comparable companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

We identified listed comparable companies, based on business of IDFC Bank and thereafter screened the selected multiples based on loan book size, growth and profitability in comparison with IDFC Bank.

Similarly we have identified listed comparable companies, based on business of CFL and thereafter screened the selected multiples based on loan book size, growth and profitability in comparison with CFL.

We have applied the multiples for both IDFC Bank and CFL to determine value of IDFC Bank & CFL respectively under the Comparable Companies' Market Multiple method.

Discounted Cash Flows (DCF) Method

Under the DCF method the projected free cash flows to the firm are discounted at the weighted average cost of capital. The sum of the discounted value of such free cash flows is the value of the firm.

Using the DCF analysis involves determining the following:

Estimating future free cash flows:

Free cash flows are the cash flows expected to be generated by the company that are available to all providers of the company's capital – both debt and equity.

Appropriate discount rate to be applied to cash flows i.e. the cost of capital:

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

We have not been provided with mid-term/long term forecasts by the Company. Hence, we have not considered DCF method of valuation.

Walker Chandiook & Co LLP

Recommendation of share exchange ratio for the Proposed Amalgamation of CFL and its Subsidiaries into IDFC Bank

Net Asset Value (NAV) Methodology

The asset based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. This valuation approach is mainly used in case where the assets base dominate earnings capability. A Scheme of Amalgamation would normally be proceeded with, on the assumption that the Companies merge as going concerns and an actual realization of the operating assets is not contemplated. The operating assets have therefore been considered at their book values. In such a going concern scenario, the relative earning power is of importance to the basis of merger, with the values arrived at on the net asset basis being of limited relevance.

As IDFC Bank and CFL are differently regulated by the Reserve Bank of India, both have different requirements for maintaining statutory reserves and liquid investments. It would therefore be not appropriate to determine relative value of the Companies using NAV methodology. However, while carrying out value using the CCM Method, the networth of the respective companies is already taken into consideration.

BASIS OF PROPOSED AMALGAMATION

The basis of valuation would have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove. Though different values have been arrived at under each of the above methodologies, for the purposes of recommending a fair exchange ratio of equity shares it is necessary to arrive at a single value for each of the business / subject companies' shares. It is however important to note that in doing so, we are not attempting to arrive at the absolute equity values of the Companies but at their relative values to facilitate the determination of a fair exchange ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each methodology.

The Share Exchange Ratio has been arrived at on the basis of a relative equity valuation of IDFC Bank and CFL using CCM method and MP method. The Share Exchange Ratio is based on the methodologies explained herein earlier and various qualitative factors relevant to each Company and the business dynamics and growth potential of the businesses of the Companies, having regard to information, key underlying assumptions and limitations.

As mentioned earlier in the Report, while the Valuers have independently carried out valuation of the Companies, they have discussed their approaches and findings with each other. However, to arrive at the consensus on the Share Exchange Ratio, suitable averaging and rounding off in the values arrived at by the Valuers have been done. Please refer Annexure I for summary of valuation workings.

Notes

- The standalone audited financial results of Capital First Limited (the 'Company' or 'CFL') for the quarter and year ended March 31, 2018 have been reviewed by the Audit Committee and subsequently approved by the Board of Directors at their respective meetings held on May 04, 2018.
- On January 13, 2018, the Board of Directors of the Company approved the merger of the Company and its wholly owned subsidiaries i.e., Capital First Home Finance Limited and Capital First Securities Limited, with IDFC Bank Limited in an all-stock transaction through a Composite Scheme of Arrangement, subject to approvals of the Reserve Bank of India (RBI), the National Housing Bank, the Competition Commission of India (CCI), the Securities and Exchange Board of India (SEBI), stock exchanges, the respective shareholders and creditors of each entity and the National Company Law Tribunal (NCLT). The appointed date for the scheme is April 01, 2018 or such other mutually agreed date. The effective date is the mutually agreed date, being a date post the last of the dates on which all condition precedents and matters, as set out in the scheme, occur or have been fulfilled or waived in accordance with the scheme. The proposed transaction however does not have any impact on the current financial results or the financial position of the Company as at March 31, 2018.
- Pursuant to circular no RBI/2017-18/129- DBR.No.BP.BC.100/21.04.048/2017-18 dated February 7, 2018 issued by the Reserve Bank of India (RBI) which permits regulated entities to defer the down grade of an account of micro,small and medium enterprise under the Micro,Small and Medium Enterprises (MSME) Act,2006, that was standard as on January 31, 2018, the Company has not opted for 180 days relaxation extended by RBI for recognition of loan as Non-Performing Assets ('NPA').

- d. The Company has accounted for provision on standard assets as per the Reserve Bank of India ('RBI') notification no. RBI/2014-15/299 dated November 10, 2014, which requires increased provision on standard assets in a phased manner over a period of three years commencing from financial year ending March 31, 2016. As a result of which provision for standard assets as at March 31, 2018 is higher by Rs. 1073.54 lakhs.
- e. During the quarter ended March 31, 2018, 75,160 stock options were exercised by eligible employees under various CFL Employees Stock Options Schemes.
- f. The Secured Listed Non-Convertible Debt securities of the Company as on March 31, 2018 are secured by first pari-passu charge on the fixed assets owned by the Company and first pari-passu/exclusive charge by way of hypothecation, over standard present and future receivables. The total asset cover required thereof has been maintained as per the terms and conditions stated in the respective Debenture Trust Deeds.
- g. RBI vide its notification no DNBR. 011/CGM (CDS)-2015 dated March 27, 2015 had revised the asset classification norms for non-performing assets ('NPA') and substandard assets under its prudential norms applicable to NBFCs in a phased manner commencing from financial year ending March 31, 2016. This has resulted in increase in gross non-performing assets by Rs. 8,541.21 lakhs. However, there is no significant impact of this change on provision for the quarter and year ended March 31, 2018.
- h. The primary business of the Company is financing. As such, there are no separate reportable segments as per the Accounting Standard (AS) - 17 'Segment Reporting' specified under Section 133 of the Companies Act, 2013 (the 'Act') read with Rule 7 of the Companies (Accounts) Rules, 2014 and Companies (Accounting Standard) Amendment Rules, 2016.
- i. The Board of Directors have recommended, subject to the approval of shareholders, dividend of Rs.2.80 per share (28%)
- j. In earlier years, the Board of Directors decided to discontinue broking business carried on through its subsidiary Capital First Securities Limited (CFSL). At the time of discontinuance of broking business of CFSL, the Company was carrying impairment provision of Rs.5,841.73 lakhs. Thereafter CFSL started other business activity which has resulted in consistent income and profitability. The management believes that the provision for diminution needs to be reversed to the extent of CFSL's net worth. Accordingly Rs.2,936.75 lakhs has been reversed. However, this has no impact on the consolidated financial statements of the Company.
- k. The figures for the quarter ended March 31, 2018 are the balancing figures between audited figures in respect of the full financial year ended March 31, 2018 and the year to date audited figures for the nine months period ended December 31, 2017.
- l. Figures for previous quarter/ year have been regrouped and/or reclassified wherever considered necessary, to conform to current quarter/ year's classifications.

“Annexure B” to the Independent Auditor’s Report 31 March 2018

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (the “Act”)

We have audited the internal financial controls over financial reporting of Capital First Home Finance Limited (the “Company”) as of 31 March 2018 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s responsibility for internal financial controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India (the “ICAI”). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company’s policies, safeguarding of its assets, prevention and detection of frauds and errors, accuracy and completeness of the accounting records, and timely preparation of reliable financial information, as required under the Act.

Auditor’s responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by the ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Capital First Home Finance Limited

“Annexure B” to the Independent Auditor’s Report 31 March 2018 (Continued)

Meaning of internal financial controls over financial reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent limitations of internal financial controls over financial reporting

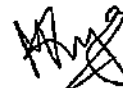

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

“Annexure B” to the Independent Auditor’s Report 31 March 2018

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (the “Act”)

We have audited the internal financial controls over financial reporting of Capital First Securities Limited (the “Company”) as of 31 March 2018 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s responsibility for internal financial controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India (the “ICAI”). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company’s policies, safeguarding of its assets, prevention and detection of frauds and errors, accuracy and completeness of the accounting records, and timely preparation of reliable financial information, as required under the Act.

Auditor’s responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by the ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Capital First Securities Limited

“Annexure B” to the Independent Auditor’s Report 31 March 2018 (Continued)

Meaning of internal financial controls over financial reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent limitations of internal financial controls over financial reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

- The loan book of the Amalgamating Company 1 is highly diversified and as of March 31, 2018 there are 33,65,005 live customers and 60,82,970 cumulative customers, and the asset quality of the Amalgamated Company is expected to improve as a result of such significant diversification of the merged loan book;
- The Amalgamating Company 1 has built substantial technological capabilities in being able to evaluate credit worthiness of consumers and small enterprises on the basis of advanced analytical models, and has developed unique skills in financing customers who have traditionally been underserved. The said models have been tested and refined over the years at a large scale and Amalgamated Company will immediately get the benefit of such years of sophisticated research in financing customers;
- In the retail business, the Amalgamating Company 1 has built a large infrastructure for booking and managing such millions of customers and to make monthly presentations for claiming recovery from their bank accounts and have deployed substantially sophisticated methodologies and automation to achieve the same in a cost efficient manner and the Amalgamated Company will benefit from such infrastructure;

INTERNAL RISK FACTORS

The below mentioned risks are the top 9 (nine) internal risk factors:

1. The profitability of the Company can be affected due to non-payment by the borrowers and other counterparties. Since most of our Company's borrowers are individuals and small and medium size companies, our Company's credit risk could be higher due to their potential inability to adapt to changes in the economic scenario, industrial scenario, global technologies, Indian regulatory and political environment. This may lead to an increase in the number and value of our Company's non-performing assets.
2. Our financial performance is particularly affected by interest rate volatility. Interest rates are sensitive to many factors beyond our control, including the monetary policies of the RBI, domestic and international economic and political conditions, inflation and other factors. Any fluctuations in the interest rates can adversely affect our borrowing costs, interest income and net interest margin, which can adversely affect results of our operations.
3. The business of the Company requires substantial debt. Our ability to borrow on acceptable terms and at competitive rates continues to depend on various factors, *inter alia*, our credit ratings, the regulatory environment, liquidity in the markets, policy initiatives in India, the perception of investors and lenders of demand for debt of HFCs, and our current and future results of operations and financial condition. Any disruption in debt funding sources will have a material adverse effect on the financial condition, results of operations and cash flows.
4. We are subject to regulations framed by applicable authorities. There can be no assurance that the applicable laws will not change in the future or that such changes or the interpretation or enforcement of existing and future laws and rules by governmental and regulatory authorities will not affect our Company's business and future financial performance.
5. The value of collateral may decrease or we may experience delays in enforcing the sale of collateral when borrowers default on their obligations to us, which may result in failure to recover the expected value of collateral security, exposing us to a potential loss.
6. Any downgrade in our credit ratings may increase interest rates for refinancing our outstanding debt, which would increase our financing costs which could have an adverse impact on our business and financial performance.
7. If we are unable to comply with the capital adequacy requirements stipulated by the NHB, our business, results of operations and cash flows may be materially and adversely affected.
8. We are dependent on our mortgage loans for a substantial part of our business and any adverse developments in this segment could adversely affect our financial condition and results of operations and cash flows.
9. We are reliant on information technology ("IT") systems in connection with financial controls, risk management and transaction processing and weaknesses, disruption or failures in IT systems could adversely impact our business.
