## And made good progress on profitability

Core operating profit (Core PPOP) excludes trading gains. All FY 19 numbers are as per reported financials for the full year. 9M FY 25 Core Operating Profit was Rs. 5,451 cr IDFC FIRST Bank

### 9M-FY25 Profitability impacted by the crisis in the MFI Industry

- PAT of the Bank for 9M-FY25 has reduced by 45% YoY.
- Reduction in PAT is largely because of the crisis in the overall MFI industry.
- MFI loans are done for meeting weaker section PSL, for inclusive lending, and for profitability.
- MFI crisis had two impacts on the Bank
  - a. Increase in the credit provisions in FY25.
  - b. Bank reduced MFI portfolio which led to reduced income in 9M FY 25 from the MFI business
- All other businesses are performing well in terms of asset quality
- Impact of MFI crisis is tapering off with improvement in collection efficiency in this business.

### Set-up stage businesses moving towards profitability

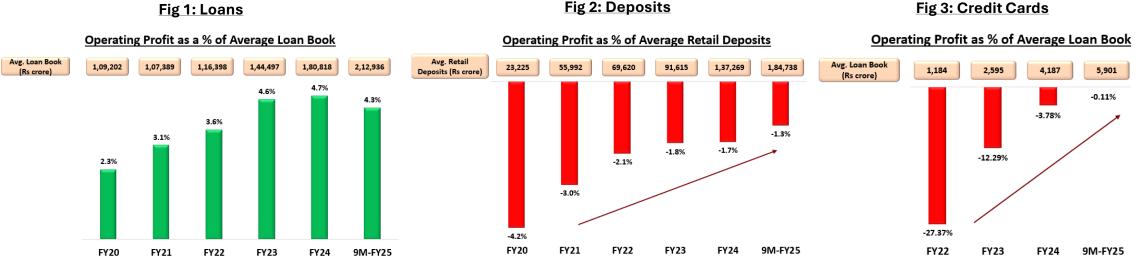

We have primarily three key components which sum up to the overall profitability of the Bank.

(a) Loans : Already has strong profitability with Cost: Income at 55% (9M-FY25). Operating Profit strong at 4.3% (Fig 1)

(b) Deposits: Raising Deposits involves branches, ATMs, technology, brand, systems, people etc. This is making loss yet because of set-up stage but moving consistently towards profitability every year. This will break even with scale. (Fig 2)

(c) Credit Cards: Credit Cards is currently making loss because it is a newly launched business, but is fast moving towards profitability. Operational breakeven achieved in 9M-FY25 within 4 years (Launched in FY22). (Fig 3) Deposits, Credit Cards and other newly launched businesses expected to break even with scale which will improve overall profits at the Bank.

### Improving Operating Leverage is the key focus of the Bank

• Tech transformation projects and cost cuts delivering results, YoY growth in Opex is reducing for the last four consecutive Quarters based on initiatives taken at the Bank.

**IDFC FIRST**

• We expect to cut further costs using technology, resulting in improved operating leverage.

### Rationale: Growth Capital to scale up the bank for profitability

- 1. The Bank has set up a branch network, ATMs, brand and technology to build a stable deposit franchise. Bank launched multiple businesses like credit cards, cash management, wealth management etc to be a full-fledged universal bank. These businesses **need to be scaled up** for optimal profitability.
- Further, the Bank proposes to grow the overall loan book at ~20% for the next few years
- 3. To enable such **scale up**, the Bank is raising the required capital for growth (details provided in page no 8)
- 4. The large fund raise will increase the capital adequacy and reduce the need for frequent fundraising at the Bank.
- 5. This high capital adequacy will position the Bank for strong and profitable growth

The overall capital adequacy and CET-I ratio has been calculated on capital position as of December 31, 2024

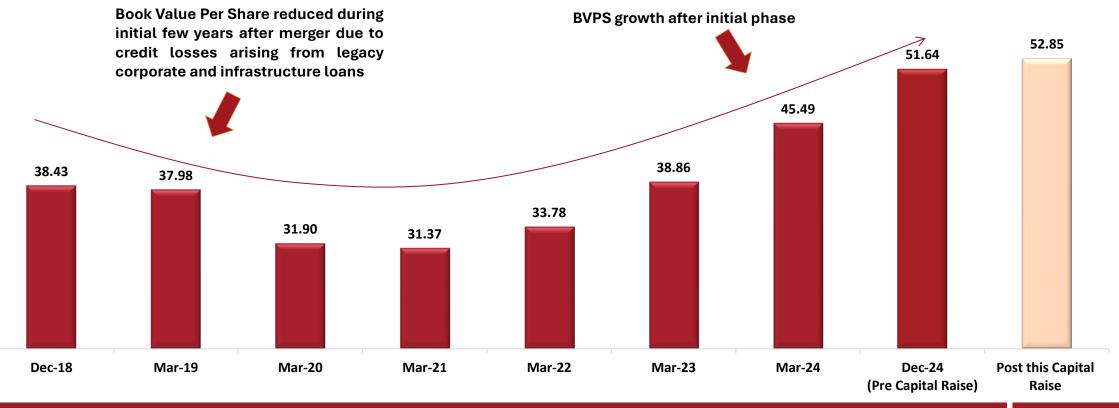

- The Bank is planning to raise ~Rs. 7,500 crore of fresh equity capital through issuance of Compulsorily Convertible Preference Shares (CCPS) at a price of Rs. 60 per share.
- CCPS amounting to ~Rs. 4,876 crore to be issued to Currant Sea Investments B.V., an affiliate company of Warburg Pincus LLC, and CCPS amounting to ~Rs. 2,624 crore to be issued to Platinum Invictus B 2025 RSC Limited, a wholly owned subsidiary of Abu Dhabi Investment Authority (ADIA), managed by its Private Equities Department.
- Currant Sea Investments B.V. to hold 9.48% and Platinum Invictus B 2025 RSC Limited to hold 5.10% of the Bank on post-money basis on conversion of CCPS.
- The proposed issues are subject to shareholder and regulatory approvals.

## **BVPS** growing since March 2021

#### The proposed fund raise will increase the Book Value per Share (BVPS) by 2.3%

#### Book Value per share (BVPS, in Rs.)

Note: Post fund raise BVPS calculated based on the Net worth as of 31st December 2024 and the proposed capital raise
