Benefits in detail

Maturity benefit

On survival of the life assured till the Date of Maturity for a fully paid policy, the following will be payable:

Maturity Benefit = Accrued Guaranteed Additions + Guaranteed Maturity Benefit (GMB)

Guaranteed Additions

Guaranteed Additions are payable on Maturity and are considered in the calculation of Death Benefit.

Guaranteed Additions (GAs) will be added to the policy at the end of every policy year if all due premiums have been paid. Each Guaranteed Addition is equal to Guaranteed Addition rate multiplied with Total Premiums Paid till the date of accrual. GA rate depends on policy term as below.

Term	Guaranteed Addition rate
10 years	9%
12 or 15 years	10%
16 or 20 years	11%

Calculation of Guaranteed Additions:

Example: If you choose a policy term of 12 years, the GA rate will be 10% p.a. If your Annual Premium is ₹ 50,000, Guaranteed Additions will be as below.

Policy year	Premiums paid for the year (₹)	Total premiums paid till date (₹)	Guaranteed Addition
1	50,000	50,000	10% x 50,000 = 5,000
2	50,000	1,00,000	10% X 1,00,000 = 10,000
—	—	—	—
9	50,000	4,50,000	10% X 4,50,000 = 45,000
10	50,000	5,00,000	10% X 5,00,000 = 50,000
11	50,000	5,00,000	10% X 5,50,000 = 55,000
12	50,000	6,00,000	10% X 6,00,000 = 60,000

Guaranteed Maturity Benefit

Your GMB will be set at policy inception and will depend on policy term, premium, premium payment term, age and gender. Your GMB may be lower than your Sum Assured.

How to calculate GMB

Example. If you are a male healthy life aged 30 with an annual premium of ₹ 50,000 payable annually and you choose a premium payment term of 10 years and policy term of 15 years your GMB will be as follows:

$$\text{GMB} = 50,000 / 146.46 \times 1000$$

GMB is the Sum Assured on maturity.

Death benefit

On death of the life assured during the Policy Term, for a Premium Paying or Fully Paid Policy ^{T&C6}, the following will be payable:

Death Benefit is equal to A or B or C or D, whichever is highest

Where,

A= Sum Assured plus accrued Guaranteed Additions

B= GMB plus accrued Guaranteed Additions

C= Minimum Death Benefit

D= Surrender Value payable as on date of death

Sum Assured on death is equal to 10 times annualized premium.

Minimum Death Benefit is equal to 105% of sum of premiums paid till date of death

On payment of Death Benefit to the claimant, the policy will terminate and all rights, benefits and interests under the policy will stand extinguished.

In the event of death of the Life Assured on the Date of Maturity, only the Maturity Benefit (if applicable) is payable and the Death Benefit shall not be payable.

Surrender benefit

You can Surrender the policy any time after payment of at least one full year's Premiums. Prior to receipt of one full year's premium, no surrender value is payable.

On policy surrender, you will get higher of the following:

- Guaranteed Surrender Value (GSV)
- Special Surrender Value (SSV)

Here ,

$$\text{GSV} = \{\text{GSV Factor} \times \{\text{Total premiums paid}\} + \{30\% \times \text{accrued guaranteed additions}\}$$

GSV factors shall be as follows:

Policy Year	GSV factor
1	15%
2	30%
3	35%
4 to 7	50%
8 to (Policy Term less 2)	$50\% + 40\% \times (\text{Policy Year} - 7) \div (\text{Policy Term} - 8)$
Policy Term less 1 to Policy Term	90%

All the factors applicable to GSV calculation are guaranteed throughout the policy term.
Please note, if you discontinue your premiums before one full years' premium has been paid then no benefits will be payable under the policy.

For more details on the surrender benefit, please refer to the policy document.

Non-Payment of Premiums: What happens if you discontinue your premiums?

If you discontinue premium payment before one full years' premium has been paid then your policy will lapse and no benefits will be paid. However, you can revive the policy within five years from the due date of the first unpaid premium.

If premium payment is discontinued after one full years' premium has been paid then your policy will continue as a 'paid-up' policy with reduced benefits as explained below:

$$\text{Paid-up Sum Assured} = \frac{\text{Sum Assured} \times \text{number of months for which premiums are paid}}{(12 \times \text{Premium Payment Term})}$$

$$\text{Paid-up Guaranteed Maturity Benefit} = \frac{\text{GMB} \times \text{number of months for which premiums are paid}}{(12 \times \text{Premium Payment Term})}$$

$$\text{Paid-up Guaranteed Addition} = \text{Guaranteed Addition rate} \times \text{Total Premiums Paid till the date of accrual} \times \left(\frac{\text{number of months for which premiums are paid}}{(12 \times \text{Premium Payment Term})} \right)$$

Once a policy becomes paid up, Paid-up Guaranteed Additions will accrue at the end of each policy year till the earlier of revival of the policy or end of the policy term.

On death of the life assured during the policy term when the policy is paid-up, the Paid-up Death Benefit will be payable and equal to the highest of A, B, C or D

Where,

- ▶ A = Paid-up Sum Assured plus accrued Guaranteed Additions
- ▶ B = Paid-up Guaranteed Maturity Benefit plus accrued Guaranteed Additions
- ▶ C = 105% of total premiums paid (excluding extra mortality premiums, Goods & Services Tax and Cess (if any) till the date of death
- ▶ D = Surrender Value payable as on date of death

In the event of death of the Life Assured on the Date of Maturity for a Paid-up policy, only the Paid -Up Maturity Benefit (if applicable) is payable and the Paid-Up Death Benefit shall not be payable.

On survival of the life assured till the end of the policy term the Maturity Benefit will be payable which is equal to paid-up GMB plus Accrued GAs.

For more details on paid-up policies, please refer to the policy document.

Revival of the policy

A policy which has discontinued payment of premiums may be revived subject to underwriting and the following conditions:

- ▶ The application for revival is made within 5 years from the due date of the first unpaid premium and before the termination date of the policy. Revival will be based on the prevailing Board approved underwriting policy.
- ▶ The policyholder furnishes, at his or her own expense, satisfactory evidence of health of the life assured as required by the Company.
- ▶ The arrears of premiums together with interest at such rate as the Company may charge for late payment of premiums are paid.
- ▶ Interest rate for revival cases are set monthly based on the prevailing yield on Government Securities. The applicable revival interest rate in August 2024 is 8.36% p.a. compounded semi-annually, this is subject to change from time to time.

The revival of the policy may be on terms different from those applicable to the policy before premiums were discontinued; for example, extra mortality premiums or charges may be applicable. We reserve the right to refuse to revive the policy. The revival will take effect only if it is specifically communicated by the Company to the policyholder.

On revival of a paid-up policy, the paid-up Sum Assured and paid-up GMB will be restored to the Sum Assured and GMB applicable at the time of premium discontinuance. The full GAs that would have accrued to the policy will be added to the policy and the reduced GAs will be reversed.
