

## Liquidity Coverage Ratio for the quarter ended September 30, 2020

The Basel Committee for Banking Supervision (BCBS) had proposed the liquidity coverage ratio (LCR) in order to ensure that a bank has an adequate stock of unencumbered high quality liquid assets (HQLA) to survive a significant liquidity stress lasting for a period of 30 days. LCR is defined as a ratio of HQLA to the total net cash outflows estimated for the next 30 calendar days.

\* The average weighted and unweighted amounts are calculated taking simple daily average of Jul 2020, Aug 2020 and Sep 2020 figures.

Although RBI has reduced the minimum required ratio from 100% to 80% till September 30, 2020 due to the ongoing COVID-19 pandemic, the Bank has maintained a significantly higher Liquidity Coverage Ratio than minimum regulatory threshold. As a strategy, the Bank is invested into GOI Bonds and corporate bonds which have resulted in a high level of HQLA. The Bank follows the criteria laid down by the RBI for daily calculation of High Quality Liquid Assets (HQLA), gross outflows and inflows within the next 30 day period. HQLA predominantly comprises Government securities in excess of minimum SLR requirement viz. Treasury Bills,

Central and State Government securities and corporate bonds in form of CP, CD and Bonds rated AA- and above with mandated haircuts applied thereto.

Bank is funded through retail CASA, retail term deposits, wholesale term deposits and long term borrowings viz. Bonds and ECBs/FCY Borrowings. Further, the reliance on retail deposits and CASA has increased substantially as compared to the previous quarters. All significant outflows and inflows determined in accordance with RBI guidelines are included in the prescribed LCR computation. Bank expects to maintain LCR ratio within regulatory guidelines.
